

Accoya® Color Grey

Accoya® Color Grey is a high-performance, pre-coloured timber that offers an immediate, low-maintenance solution for weathered timber. Resistant to rot and insect attack, Accoya Color Grey has a lifespan of 60 years and is warrantied for up to 50 years dependant on application.

Attributes

- Origin: New Zealand
- Certification: FSC®
- Durability Class: BS EN 350-2 Class 1
- Desired service life (BS8417): Naturally durable. 60 years
- Warranty: 50 years above ground
- Moisture content: Kiln dried to >8% (+/- 2%)
- Density: 515kg per m³
- Movement group: Very small
- Reaction to fire (EN14915): Not currently treatable
- Applications: External cladding and decking

Appearance

Accoya Color Grey retains the natural beauty and character of real wood featuring a subtle, flat-sawn grain pattern. The grain is typically fine and even creating a smooth surface with a muted, silver-grey tone that runs through the entire cross-section of the wood. With its pre-coloured, matte finish, Accoya Color Grey delivers the look of aged timber from day one.

Grading

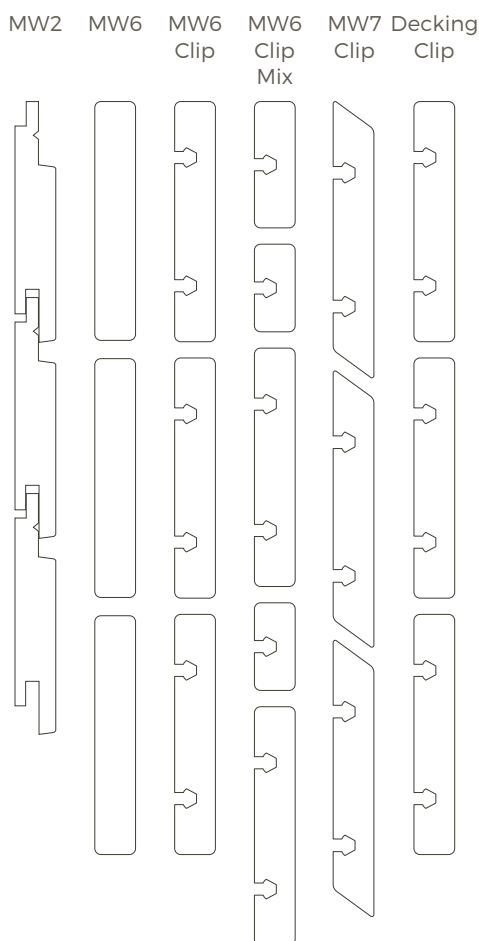

Millworks A Grade timber is a high-quality grade, featuring primarily clear flat-sawn boards that showcase unique and interesting grain patterns. This grade is characterised by long, clear sections of timber with limited isolated defects, such as small knots and irregularities. This grade is perfect for projects requiring a refined and elegant finish.

Finishes

Accoya Color Grey is a solid, pre-coloured natural timber, not a surface-coated product. Unlike uncoated wood that gradually weathers to a silver-grey, it starts with a consistent patina that it maintains throughout its lifecycle. This makes it ideal for areas prone to uneven weathering, such as covered porches, balconies or soffits as well as varying elevations.

Accoya Color Grey timber ensures minimal variation across all elevations, regardless of sun or weather exposure.

Popular profile options

Accoya Color Grey is available with a planed, brushed or MillSawn finish. MillSawn is a twist on our traditional fine sawn surface texture which increases definition and adds texture to any project.

Fixing systems

Accoya Color Grey is available in a range of secret and face fixed profiles. Specifying the correct fixings is critical to the service life of timber cladding.

For open rainscreen profiles the Millworks Secret Clip System offers durable secret fixing. MillFix stainless steel screws are also available for all profiles.

All fixing systems can be written as part of an H21 specification.
