

# MILLCOAT™

Millworks® offer in-house advanced factory coating systems in collaboration with industry leading paint manufacturers. After extensive research and development, Millworks® use innovative technology in our state of the art finishing line which produces consistent coating results for any project.

Translucent or opaque environmentally friendly, water based coatings offered in a wide range of RAL colours, applied under controlled factory conditions can be applied to any chosen timber product. This gives exceptional performance of durability and stability ensuring cladding is protected from UV-light, rain, humidity, cold and heat.

OrganoWood® can be factory coated by Millworks, a silicone based technology that increases the weathering time and consistency to the timber, resulting in a natural silver/grey look to all elevations.

By utilising Millworks off-site, purpose built factory painting line, the risk of weather variations, time frames and application rates can be eliminated. We offer set lead times, premium finishing and up front costs.

Consistent finish applied under controlled factory conditions.

Coating on all 4 sides for increased performance.

Guaranteed up-front cost, no additional on-site labour required.

## MILLWORKS® RECOMMENDS

- Surface texture can be added to create accentuated depth to the timber, this also increases coating performance. For best results Milltex® surface finish is recommended.
- Millfix™ secret-fix fixing systems enhance longevity of a factory coated finish. By secret-fixing and using ventilation strips, the front faces of the cladding boards are left fully intact and well ventilated.
- All cross-cutting should be sealed on-site prior to installation for increased coating performance.

## SPECIFICATION DATA

### REFERENCE FEATURES

- **Millcoat™ factory coatings.**

- Applied under controlled factory conditions.
- Wide range of RAL colours.
- Organowood® for a consistent silver/grey facade.
- No hidden costs.

### PROFILES

- MW-2, MW-5, MW-6, MW-7, MW-11, MW-12 I, MW-12 II, MW-12 III and custom profiles available when specified.

### FIRE - TREATMENT

- Fire retardant treatment (FRX Exterior). Complies with the National Building Regulations where Euroclass B or C fire performance is required.
- Coating to RAL (any colour) maintains FRX fire certification.

### TEXTURES

- Planed, Brushed, Burned & Brushed, Fine-sawn or Milltex®.
